## Interim Report on the Results of the Second Follow-up Survey Covering FY2012 Pregnancy and Birth Survey Respondents

## 1. Outline

(1) Purpose

To provide continuous support to those who were pregnant or nursing around the time of the 3.11 disaster, by assessing their health conditions through the second follow-up survey of FY2012 Pregnancy and Birth Survey (here after PBS) respondents.
(2) Background

The PBS found a high prevalence of depressive symptoms among respondents immediately after the disaster. Accordingly, follow-up surveys were conducted in FY2015 through FY2018, covering respondents of FY2011FY2014 surveys at four years post-partum, when loss of confidence in childcare tended to increase.

Respondents to the FY2011 and FY2012 PBS showed strong concerns about radiation effects and high depressive symptoms. Such tendencies were also observed in their follow-ups, from which it was considered that they were still impacted by the disaster.

Respondents to the FY2013 and FY2014 PBS, on the other hand, indicated fewer depressive symptoms; their main concerns were general issues in child rearing. Therefore, in the FY2019 and FY2020 PBS, we conducted a second follow-up (and offered support) for the FY2011 and FY2012 PBS respondents, respectively, instead of the planned four-year post-partum follow-up for FY2015 and FY2016 PBS respondents.
(3) Covered population

Of FY2012 PBS respondents (excluding those who miscarried, terminated their pregnancy, or had a stillbirth), 5,152 persons, identified through municipal records to be living with children in their respective municipalities, were covered.
[For reference]

| Year | Survey | Covered respondents | No. of persons |
| :---: | :---: | :---: | :---: |
| FY2015 | First Follow-up | FY2011 PBS respondents | 7,252 |
| FY2016 |  | FY2012 PBS respondents | 5,602 |
| FY2017 |  | FY2013PBS respondents | 5,734 |
| FY2018 |  | FY2014 PBS respondents | 5,856 |
| FY2019 | Second Follow-up | FY2011 PBS respondents | 6,643 |
| FY2020 |  | FY2012 PBS respondents | 5,152 |

(4) Survey methods
A. Survey sheet: self-administered questionnaire (post card)
B. Date of questionnaire distribution: January 15, 2021
C. Response methods: by post or online
*Online responses were accepted from January 15 to April 30, 2021.
(5) Survey items

The following items and a free comment section were in the questionnaire.
How many children do you have? ( )
How old is your youngest child? ( ) years and ( ) months
Q1. Do you usually consider yourself healthy?
$\square$ Yes, I think I am very healthy. $\quad$ Yes, I think I am healthy. $\quad \square$ No, I don't think I am so healthy.
$\square$ No, I don't think I am healthy.

Q2. Have you often felt down or depressed during the past month?
$\square$ Yes $\square$ No
Q3. During the past month, have you often felt uninterested in or unable to truly enjoy things?
$\square$ Yes $\square$ No
Q4. Do you sometimes feel unconfident about child rearing?
$\square$ Yes $\quad \square$ No $\quad \square$ Neither yes nor no
Q5. Please check all the boxes that describe what you are worried about regarding radiation effects.
$\square$ Water $\quad$ Food $\quad$ Your child's outdoor activities $\quad$ Your child's health $\quad$ Prejudice
$\square$ Genetic effects $\quad$ OOther
Q6. Has your child ever had a disease that required hospitalization?
$\square$ Yes (disease name: ) $\square$ No
Q7. Please check all the boxes that describe what you are anxious about regarding your child.
$\square$ Mental and physical development $\quad$ Diseases $\square$ Lifestyle habits $\quad$ School life $\square$ Other
(6) Data tabulation period

Responses returned from January 15 to June 30, 2021 were tabulated for this report.
[For reference]

| Year | Survey | Data tabulation period <br> (Period for accepting online responses) |
| :---: | :---: | :---: |
| FY2015 | Follow-up Survey Covering FY2011 <br> Survey Respondents <br> ("First Follow-up for FY2011") | September 14, 2015-May 31, 2016 <br> (Online response was not available) |
| FY2016 | Follow-up Survey Covering FY2012 <br> Survey Respondents <br> ("First Follow-up for FY2012") | November 22, 2016-June 30, 2017 <br> (November 22, 2016-June 30, 2017) |
| FY2017 | Follow-up Survey Covering FY2013 <br> Survey Respondents <br> ("First Follow-up for FY2013") | January 12-August 31, 2018 <br> (January 12-April 30, 2018) |
| FY2018 | Follow-up Survey Covering FY2014 <br> Survey Respondents <br> ("First Follow-up for FY2014") | January 11-August 31, 2019 <br> (January 11-April 30, 2019) |
| FY2019 | Second Follow-up Survey Covering <br> FY2011 Survey Respondents <br> ("Second Follow-up for FY2011") | January 10-August 31, 2020 <br> (January 10-April 30, 2020) |
| FY2020 | Second Follow-up Survey Covering <br> FY2012 Survey Respondents <br> ("Second Follow-up for FY2012") | January 15-June 30, 2021 <br> (January 15-April 30, 2021) <br> The final report was prepared with <br> the data tabulated by August 31, 2021. |

## 2. Interim summary of survey results

Survey results are as shown below in 5.1 through 5.3, under " 5 . Tabulated Results of the Second Follow-up for FY2012." Note that the total may not match the sum of valid responses due to missing values in each question item.
(1) Number of responses (response rate) (See Table 1)

The number of responses (response rate) in the Second Follow-up for FY2012 was 2,171 (42.1\%) and the number of valid responses was 2,171 (There were no invalid responses). Among them, the number of online responses (response rate) was 901 (41.5\%).
[For reference]

| Year | Number of responses |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Total |  |  |  |
|  |  | Number of <br> responses <br> (Response rate) | By post | Online | Percentage of <br> online <br> responses |
| FY2015 |  | 2,554 <br> $(35.2 \%)$ | 2,554 | - | - |
| FY2016 | First Follow-up <br> for FY2012 | 2,021 <br> $(36.1 \%)$ | 1,719 | 302 | $14.9 \%$ |
| FY2017 | First Follow-up <br> for FY2013 | 2,706 <br> $(47.2 \%)$ | 2,062 | 644 | $23.8 \%$ |
| FY2018 | First Follow-up <br> for FY2014 | 2,719 <br> $(46.4 \%)$ | 1,951 | 768 | $28.2 \%$ |
| FY2019 | Second Follow-up <br> for FY2011 | 2,354 <br> $(35.4 \%)$ | 1,641 | 713 | $30.3 \%$ |
| FY2020 | Second Follow-up <br> for FY2012 | 2,171 <br> $(42.1 \%)$ | 1,270 | 901 | $41.5 \%$ |

(2) Number of responses, by area of residence (See Table 1)

The number of responses (with response rates in parentheses) by area of residence in the Second Follow-up for FY2012 was as follows: 710 (51.4\%) in Kempoku, 578 (39.6\%) in Kenchu, 153 (38.3\%) in Kennan, 106 (34.0\%) in Soso, 351 (36.7\%) in Iwaki, 247 (41.9\%) in Aizu, and 26 (48.1\%) in Minamiaizu.
[For reference]

| Year | Survey | Number of responses, by area of residence <br> (\%) |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Kenpoku | Kenchu | Kennan | Soso | Iwaki | Aizu | Minamiaizu |
| FY2015 | First Follow-up for FY2011 | $\begin{gathered} 679 \\ (38.7) \\ \hline \end{gathered}$ | $\begin{gathered} 721 \\ (32.7) \\ \hline \end{gathered}$ | $\begin{gathered} \hline 168 \\ (34.1) \\ \hline \end{gathered}$ | $\begin{gathered} 256 \\ (34.9) \\ \hline \end{gathered}$ | $\begin{gathered} 434 \\ (35.9) \\ \hline \end{gathered}$ | $\begin{gathered} 271 \\ (34.5) \\ \hline \end{gathered}$ | $\begin{gathered} 25 \\ (34.7) \\ \hline \end{gathered}$ |
| FY2016 | First Follow-up for FY2012 | $\begin{gathered} 675 \\ (45.3) \\ \hline \end{gathered}$ | $\begin{gathered} 508 \\ (32.2) \\ \hline \end{gathered}$ | $\begin{gathered} 165 \\ (36.4) \\ \hline \end{gathered}$ | $\begin{gathered} 113 \\ (30.5) \\ \hline \end{gathered}$ | $\begin{gathered} 330 \\ (32.5) \\ \hline \end{gathered}$ | $\begin{gathered} 212 \\ (33.4) \\ \hline \end{gathered}$ | $\begin{gathered} 18 \\ (29.0) \\ \hline \end{gathered}$ |
| FY2017 | First Follow-up for FY2013 for FY2013 | $\begin{gathered} 770 \\ (49.4) \\ \hline \end{gathered}$ | $\begin{gathered} 716 \\ (47.1) \\ \hline \end{gathered}$ | $\begin{gathered} 204 \\ (44.0) \\ \hline \end{gathered}$ | $\begin{gathered} 192 \\ (46.6) \\ \hline \end{gathered}$ | $\begin{gathered} 479 \\ (46.0) \\ \hline \end{gathered}$ | $\begin{gathered} 315 \\ (46.9) \\ \hline \end{gathered}$ | $\begin{gathered} 30 \\ (44.1) \\ \hline \end{gathered}$ |
| FY2018 | First Follow-up for FY2014 | $\begin{gathered} 753 \\ (51.5) \\ \hline \end{gathered}$ | $\begin{gathered} 815 \\ (45.8) \\ \hline \end{gathered}$ | $\begin{gathered} 194 \\ (45.9) \\ \hline \end{gathered}$ | $\begin{gathered} 175 \\ (41.8) \\ \hline \end{gathered}$ | $\begin{gathered} 480 \\ (46.7) \\ \hline \end{gathered}$ | $\begin{gathered} 281 \\ (40.5) \\ \hline \end{gathered}$ | $\begin{gathered} 21 \\ (38.9) \\ \hline \end{gathered}$ |
| FY2019 | Second Follow-up for FY2011 | $\begin{gathered} 655 \\ (40.4) \\ \hline \end{gathered}$ | $\begin{gathered} 639 \\ (31.2) \\ \hline \end{gathered}$ | $\begin{gathered} 125 \\ (28.7) \\ \hline \end{gathered}$ | $\begin{gathered} 181 \\ (30.4) \\ \hline \end{gathered}$ | $\begin{gathered} 447 \\ (38.9) \\ \hline \end{gathered}$ | $\begin{gathered} 281 \\ (38.7) \\ \hline \end{gathered}$ | $\begin{gathered} 26 \\ (37.7) \\ \hline \end{gathered}$ |
| FY2020 | Second Follow-up for FY2012 | $\begin{gathered} 710 \\ (51.4) \\ \hline \end{gathered}$ | $\begin{gathered} 578 \\ (39.6) \\ \hline \end{gathered}$ | $\begin{gathered} 153 \\ (38.3) \\ \hline \end{gathered}$ | $\begin{gathered} 106 \\ (34.0) \\ \hline \end{gathered}$ | $\begin{gathered} 351 \\ (36.7) \\ \hline \end{gathered}$ | $\begin{gathered} 247 \\ (41.9) \\ \hline \end{gathered}$ | $\begin{gathered} 26 \\ (48.1) \\ \hline \end{gathered}$ |

(3) Maternal mental health conditions (See Table 4-7)
A. The proportion of mothers who responded that their subjective health was poor ("Not so healthy" or "Not healthy") was $9.4 \%$. The proportion was $9.3 \%$ in the First Follow-up for FY2012, four years prior (Q1).
[For reference]

| Survey | Second <br> Follow-up | First <br> Follow-up | Main Survey |
| :---: | :---: | :---: | :---: |
| FY2011 survey <br> respondents | $9.8 \%$ | $9.6 \%$ | This question <br> was not <br> included. |
| FY2012 survey <br> respondents | $9.4 \%$ | $9.3 \%$ | $3.8 \%$ |
| FY2013 survey <br> respondents | - | $7.9 \%$ | $3.7 \%$ |
| FY2014 survey <br> respondents | - | $7.9 \%$ | $3.9 \%$ |

B. The proportion of mothers who were deemed as having depressive symptoms was $27.2 \%$. The proportion was $25.7 \%$ in the First Follow-up for FY2012, four years prior (Q2, Q3).
[For reference]

| Survey | Second <br> Follow-up | First <br> Follow-up | Main Survey |
| :---: | :---: | :---: | :---: |
| FY2011 survey <br> respondents | $24.3 \%$ | $25.6 \%$ | $27.1 \%$ |
| FY2012 survey <br> respondents | $27.2 \%$ | $25.7 \%$ | $25.5 \%$ |
| FY2013 survey <br> respondents | - | $23.5 \%$ | $24.5 \%$ |
| FY2014 survey <br> respondents | - | $22.5 \%$ | $23.4 \%$ |

Reference: According to the 2010 national survey to assess toddlers' health status (conducted by the Japanese Society of Child Health), $21.8 \%$ of mothers with children aged 1 to 6 years (pre-school) responded that they cannot say they are in good mental condition.
(4) Family life and child rearing (See Table 8)

The proportion of mothers who responded that they sometimes feel unconfident about child rearing was $18.8 \%$. The proportion was $18.2 \%$ in the First Follow-up for FY2012, four years prior (Q4).
[For reference]

| Survey | Second <br> Follow-up | First <br> Follow-up | Main Survey |
| :---: | :---: | :---: | :---: |
| FY2011 survey <br> respondents | $19.1 \%$ | $15.8 \%$ | This question <br> was not <br> included. |
| FY2012 survey <br> respondents | $18.8 \%$ | $18.2 \%$ | $15.4 \%$ |
| FY2013 survey <br> respondents | - | $16.7 \%$ | $17.5 \%$ |
| FY2014 survey <br> respondents | - | $17.7 \%$ | $16.6 \%$ |

Reference: According to the 2010 national survey to assess toddlers' health status (conducted by the Japanese Society of Child Health), $23.0 \%$ of mothers with children aged 1 to 6 (pre-school children) responded that they sometimes feel unconfident about child rearing.
(5) Anxiety about radiation effects (See Table 9)

The proportion of mothers who checked at least one box in the list of anxieties about radiation effects was $84.0 \%$. Among them, the proportion of those who checked the box for the child's health was $62.7 \%$ (Q5).
[For reference]

| Survey | Those who checked at least one box <br> for anxiety about radiation effects |  | Those who checked the box for <br> child's health |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Second <br> Follow-up | First <br> Follow-up | Second <br> Follow-up | First <br> Follow-up |
| FY2011 survey <br> respondents | $87.2 \%$ | $94.2 \%$ | $68.1 \%$ | $79.5 \%$ |
| FY2012 survey <br> respondents | $84.0 \%$ | $90.9 \%$ | $62.7 \%$ | $68.7 \%$ |
| FY2013 survey <br> respondents | - | $87.5 \%$ | - | $66.3 \%$ |
| FY2014 survey <br> respondents | - | $85.4 \%$ | - | $63.3 \%$ |

(6) Children's health conditions and mothers' anxiety about their children (See Tables 10-1, 10-2, and 11)
A. The proportion of mothers who responded that hospitalization had been required for a child's disease was $27.2 \%$. Major diseases for hospitalization included pneumonia, respiratory syncytial virus infection, bronchitis, and Kawasaki disease (Q6).
[For reference]

| Survey | Second <br> Follow-up | First <br> Follow-up |
| :---: | :---: | :---: |
| FY2011 survey <br> respondents | $26.5 \%$ | $24.7 \%$ |
| FY2012 survey <br> respondents | $27.2 \%$ | $24.4 \%$ |
| FY2013 survey <br> respondents | - | $23.7 \%$ |
| FY2014 survey <br> respondents | - | $25.3 \%$ |

B. The proportion of mothers who checked at least one box in the list of anxieties about their children was 72.5\% (Q7).
[For reference]

| Survey | Those who checked at <br> least one box for anxiety <br> about their children |  | Those who checked the <br> box for anxiety about <br> physical and mental <br> development |  | Those who checked the <br> box for anxiety about <br> diseases |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Second <br> Follow-up | First <br> Follow-up | Second <br> Follow-up | First <br> Follow-up | Second <br> Follow-up | First <br> Follow-up |
| FY2011 survey <br> respondents | $68.8 \%$ | $70.8 \%$ | $50.8 \%$ | $56.1 \%$ | $34.3 \%$ | $57.6 \%$ |
| FY2012 survey <br> respondents | $72.5 \%$ | $66.9 \%$ | $52.1 \%$ | $56.9 \%$ | $26.7 \%$ | $45.5 \%$ |
| FY2013 survey <br> respondents | - | $61.2 \%$ | - | $57.4 \%$ | - | $40.4 \%$ |
| FY2014 survey <br> respondents | - | $63.4 \%$ | - | $56.9 \%$ | - | $38.7 \%$ |

(7) Content of free comments (See Tables 12-1 and 12-2)

A total of 247 respondents (11.4\%) wrote comments in the free comment section. The most frequently raised topics were those related with the corona pandemic, positive comments about this survey, and consultation about child rearing.
[For reference]

| Year | Survey | Those who wrote comments (\%) | No. 1 topic | No. 2 topic | No. 3 topic | No. 4 topic | No. 5 topic |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\begin{gathered} \text { FY } \\ 2015 \end{gathered}$ | First Follow-up for FY2011 | $\begin{gathered} 383 \\ (15.0 \%) \end{gathered}$ | Anxiety about radiation effects on fetus/child 53(13.8\%) | Positive comments about this survey 47(12.3\%) | Opinions/complaints about this survey 44(11.5\%) | Request for information on radiation and survey results $37(9.7 \%)$ | Request regarding thyroid examination $23(6.0 \%)$ |
| $\begin{gathered} \text { FY } \\ 2016 \end{gathered}$ | First Follow-up for FY2012 | $\begin{gathered} 186 \\ (9.2 \%) \\ \hline \end{gathered}$ | Positive comments about this survey 33(17.7\%) | Opinions/complaints about this survey 24(12.9\%) | Anxiety about radiation effects on fetus/child 23(12.4\%) | Consultation about child rearing 17(9.1\%) | Request for improved parenting support 14(7.5\%) |
| $\begin{gathered} \text { FY } \\ 2017 \end{gathered}$ | First <br> Follow-up for FY2013 | $\begin{gathered} 208 \\ (7.7 \%) \\ \hline \end{gathered}$ | Positive comments about this survey 36(17.3\%) | Opinions/complaints about this survey $25(12.0 \%)$ | Anxiety about radiation effects on fetus/child 24(11.5\%) | Mother's own poor mental health 16(7.7\%) | Request for improved parenting support 15(7.5\%) |

| $\begin{gathered} \text { FY } \\ 2019 \end{gathered}$ | Second Follow-up for FY2011 | $\begin{gathered} 304 \\ (12.9 \%) \\ \hline \end{gathered}$ | Consultation <br> about child rearing 82(27.0\%) | Anxiety about radiation effects on fetus/child 53(17.4\%) | Mother's own poor physical health $36(11.8 \%)$ | Positive comments about this survey 28(9.2\%) | Mother's own poor mental health 26(8.6\%) |
| $\begin{gathered} \text { FY } \\ 2020 \end{gathered}$ | Second Follow-up for FY2012 | $\begin{gathered} 247 \\ (11.4 \%) \end{gathered}$ | Corona pandemic 53(21.5\%) | Positive comments about this survey 47(19.0\%) | Consultation <br> about child rearing 44(17.8\%) | Anxiety about radiation effects on fetus/child $37 \text { (15.0\%) }$ | Mother's own poor mental health $30(12.1 \%)$ |

(8) Conclusion

The proportion of mothers with depressive symptoms in the Second Follow-up for FY2012 Survey Respondents showed a temporal increase, compared with the FY2012 Main Survey eight years prior and the First Follow-up for FY2012 four years prior.

There was also an increase in the proportion of mothers with anxieties about their children and the proportion of mothers with poor subjective health while the proportion of mothers with anxieties about radiation effects showed a decline.
A. The response rate was $42.1 \%$, which is higher than the First Follow-up for FY2012, four years prior.
B. $9.4 \%$ of the respondents had poor subjective health (those who responded "not so healthy" or "not healthy"). This was at a similar level compared with the First Follow-up for FY2012, four years prior.
C. $27.2 \%$ of the respondents had depressive symptoms, and a temporal increase was shown compared with the FY2012 Main Survey eight years prior and the First Follow-up for FY2012 four years prior. It was also higher than the Second Follow-up for FY2011 conducted last year.
D. $84.0 \%$ of the respondents checked at least one box in the list of anxieties about radiation effects. This was a decrease from the First Follow-up for FY2012 four years prior and the Second Follow-up for FY2011 last year.
E. $72.5 \%$ of the respondents checked at least one box in the list of anxieties about their children. This was higher than the First Follow-up for FY2012 four years prior and the Second Follow-up for FY2011 last year. Most common anxiety was about physical and mental development of their children (52.1\%).
F. There were $11.4 \%$ of the respondents who wrote in the free comment section. The most frequently raised topic was the corona pandemic, followed by positive comments about this survey and consultation about child rearing.

## 3. Outline of Post-Survey Support

(1) Purpose

To address anxieties of the Second Follow-up of FY2012 Survey respondents who were deemed to be in need of counselling and support by providing telephone/online counselling and support from midwives and public health nurses.
(2) Support candidates (See Table 13)

Among respondents to the Second Follow-up for the FY2012 Survey, those who were judged to be in need of telephone counselling/support ("support candidates").
(3) Criteria for providing support (See Table 14)

Respondents who fall under either A or B below:
Criteria A: Those who responded "yes" to two questions regarding depressive symptoms (Q2, Q3)
Criteria B: Those who wrote comments that suggest the need for support (in the free comment section or other parts of the questionnaire)
e.g., comments suggesting severe depression, the need for support in child rearing, anxieties about radiation levels, poor health conditions, request for direct response or concrete information, or request for support.
(4) Methods

Counselling and support via telephone and email

## 4. Summary of Results of Post-Survey Support

Detailed results of post-survey support are as shown below in 5. Interim Results of the Second Follow-up for the FY2012 Survey Respondents, subpart (4) Implementation status of post-survey support,
(1) Number of support candidates (See Tables 13 and 14)

Of 2,171 respondents from January 15 to June 30, 2021, there were 384 support candidates.
Since the FY2017 Survey, we started to include as candidates for support those who expressed specific anxieties in places other than the questionnaire's free comment section. As a result, the proportion of support candidates was $17.7 \%$ in total, with $13.2 \%$ based on Criteria A and $4.5 \%$ based on Criteria B.
[For reference]

| Year | Survey | Respondents | Support candidates based on Criteria A (\%) | Support candidates based on Criteria B <br> (\%) |  | Total support candidates (\%) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | Based on <br> comments in the <br> free comment <br> section | Based on comments in other parts in the questionnaire |  |
| FY2015 | First Follow-up for FY2011 | 2,554 | $\begin{gathered} 299 \\ (11.7 \%) \\ \hline \end{gathered}$ | $\begin{gathered} 76 \\ (3.0 \%) \\ \hline \end{gathered}$ | - | $\begin{gathered} 375 \\ (14.7 \%) \end{gathered}$ |
| FY2016 | First Follow-up for FY2012 | 2,021 | $\begin{gathered} 209 \\ (10.3 \%) \\ \hline \end{gathered}$ | $\begin{gathered} 47 \\ (2.3 \%) \\ \hline \end{gathered}$ | - | $\begin{gathered} 256 \\ (12.7 \%) \\ \hline \end{gathered}$ |
| FY2017 | First Follow-up for FY2013 | 2,706 | $\begin{gathered} 277 \\ (10.2 \%) \\ \hline \end{gathered}$ | $\begin{gathered} \hline 51 \\ (1.9 \%) \\ \hline \end{gathered}$ | $\begin{gathered} 65 \\ (2.4 \%) \\ \hline \end{gathered}$ | $\begin{gathered} 393 \\ (14.5 \%) \\ \hline \end{gathered}$ |
| FY2018 | First Follow-up for FY2014 | 2,719 | $\begin{gathered} \hline 265 \\ (9.7 \%) \\ \hline \end{gathered}$ | $\begin{gathered} 31 \\ (1.1 \%) \\ \hline \end{gathered}$ | $\begin{gathered} 84 \\ (3.1 \%) \\ \hline \end{gathered}$ | $\begin{gathered} 380 \\ (14.0 \%) \\ \hline \end{gathered}$ |
| FY2019 | Second Followup for FY2011 | 2,354 | $\begin{gathered} 295 \\ (12.5 \%) \\ \hline \end{gathered}$ | $\begin{gathered} 92 \\ (3.9 \%) \\ \hline \end{gathered}$ | $\begin{gathered} 34 \\ (1.4 \%) \\ \hline \end{gathered}$ | $\begin{gathered} 421 \\ (17.9 \%) \\ \hline \end{gathered}$ |
| FY2020 | Second Followup for FY2012 | 2,171 | $\begin{gathered} 286 \\ (13.2 \%) \\ \hline \end{gathered}$ | $\begin{gathered} 69 \\ (3.2 \%) \\ \hline \end{gathered}$ | $\begin{gathered} 29 \\ (1.3 \%) \\ \hline \end{gathered}$ | $\begin{gathered} 384 \\ (17.7 \%) \\ \hline \end{gathered}$ |

* If a respondent falls under both Criteria A and B, the person was counted as a support candidate based on Criteria A.
(2) Topics mentioned during support provision (See Table 15)

The most common topics mentioned by respondents were "mother's own physical and mental health conditions" (32.8\%), followed by "child rearing (daily life)" (18.8\%), based on the same support criteria as those in the previous follow-up surveys.

The proportion of "questions and anxiety about radiation effects" was $8.3 \%$.
[For reference]

*1 The support criteria and data entry method (questionnaire format, data entry staff, etc.) were changed in the First Follow-up for FY2013 and those that followed.
*2 This criterion was added in the First Follow-up for FY2013 and those that followed.
(3) Reasons for ending support (See Table 16)

The most common reasons for ending support were "listened carefully" (supporters listened carefully and helped to sort out the respondent's problems) in 214 cases (55.9\%), followed by "provided information" (supporters provided information on relevant municipal contact points and other useful information) in 105 cases (27.4\%). Support ended because support candidates were "absent" at the time of phone call in 73 cases
(19.1\%). (Note: Multiple answers allowed. The denominator for calculating percentages is 383, the total number of support candidates, not support recipients, because one candidate had not received support as of the end of June, 2021.)
[For reference]

| Year | Survey | No. 1 reason | No. 2 reason | No. 3 reason | Absent |
| :---: | :---: | :---: | :---: | :---: | :---: |
| FY2015 | First Follow-up for FY2011 | Listened carefully*1 197(52.5\%) | Provided information *2 105(28.0\%) | Confirmed consultation availability *3 29(7.7\%) | 131 (34.9\%) |
| FY2016 | First Follow-up for FY2012 | Listened carefully $159(62.1 \%)$ | Provided information $53(20.7 \%)$ | Confirmed consultation availability 26(10.2\%) | 70 (27.3\%) |
| FY2017 | First Follow-up for FY2013 | Listened carefully 245(62.3\%) | Provided information 133(33.8\%) | Confirmed consultation availability 66(16.8\%) | 119 (30.3\%) |
| FY2018 | First Follow-up for FY2014 | Listened carefully $229(60.3 \%)$ | Provided information 90(23.7\%) | Confirmed consultation availability 55(14.5\%) | 124 (32.6\%) |
| FY2019 | Second Followup for FY2011 | Listened carefully 217(51.5\%) | Provided information 98(23.3\%) | Confirmed consultation availability 37(8.8\%) | 98 (23.3\%) |
| FY2020 | Second Followup for FY2012 | Listened carefully 214(55.9\%) | Provided information 105(27.4\%) | Confirmed consultation availability 31(8.1\%) | 73 (19.1\%) |

*1 Support ended after listening carefully and helping the mother sort out her problems.
*2 Support ended after providing information on relevant municipal departments and other useful information.
*3 Support ended after confirming that the mother had already seen a doctor or has someone to consult with.

## (4) Conclusion

A. The proportion of those deemed to be in need of support based on the questions asking about depressive symptoms was $13.2 \%$, an increase from last year's Second Follow-up for FY2011.
B. The most frequently mentioned topics during support was "mother's physical and/or mental health" according to the same criteria for support that were used in the previous follow-up surveys. "Questions and anxieties about radiation effects" decreased from the First Follow-up for FY2012 four years prior but increased from the Second Follow-up for FY2011 last year.
C. The most common reason for ending support was "listened carefully" (supporters listened carefully and helped the mother sort out her problems).

## 5. Interim Results of the Second Follow-up for FY2012

Covered population: 5,152 respondents of the FY2012 Pregnancy and Birth Survey, who gave a live birth and were confirmed to be living with their children as of September 2020
Tabulated responses: 2,171 responses received from January 15 to June 30, 2021. Survey sheets were sent out by post on January 15, 2021.

* The sum of individual percentages for each question item may not add up to $100 \%$, due to rounding.
(1) Number of survey sheets sent and returned
[Table 1]

| District | Survey sheets sent |  | Responses (interim results) |  |  |  |  |  |

| Kennan | 51 | 49．0\％ | 51 | 49．0\％ | 52 | 50．0\％ | 31 | 29．8\％ | 1 | 1．0\％ | 104 |
| Soso | 35 | 50．7\％ | 37 | 53．6\％ | 27 | 39．1\％ | 20 | 29．0\％ | 1 | 1．4\％ | 69 |
| Iwaki | 138 | 54．1\％ | 103 | 40．4\％ | 127 | 49．8\％ | 72 | 28．2\％ | 4 | 1．6\％ | 255 |
| Aizu | 78 | 47．3\％ | 67 | 40．6\％ | 74 | 44．8\％ | 44 | 26．7\％ | 6 | 3．6\％ | 165 |
| Minamiaizu | 8 | 44．4\％ | 9 | 50．0\％ | 4 | 22．2\％ | 3 | 16．7\％ | 1 | 5．6\％ | 18 |
| Total | 821 | 52．1\％ | 698 | 44．3\％ | 698 | 44．3\％ | 420 | 26．7\％ | 51 | 3．2\％ | 1，575 |
| FY2019 | 823 | 50．8\％ | 721 | 44．5\％ | 672 | 41．5\％ | 555 | 34．3\％ | 40 | 2．5\％ | 1，620 |

＊The denominator for percentage calculations is the number of valid responses（those who checked at least one box）．The sum of individual percentages for each question item may not add up to $100 \%$ because multiple answers were allowed．
＊ $72.5 \%$ of the respondents checked at least one box（1，575 out of 2,171 respondents）．
＊In the FY2019 survey，the percentage was $68.8 \%$（1，620 out of 2,354 respondents）．

## （3）Free comments

【Table 12－1】 Proportion of those who wrote in the free comment section

| District | Those who wrote <br> comments |  | Those who didn＇t <br> write comments |  | Total |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Kenpoku | 75 | $10.6 \%$ | 635 | $89.4 \%$ | 710 |
| Kenchu | 66 | $11.4 \%$ | 512 | $88.6 \%$ | 578 |
| Kennan | 20 | $13.1 \%$ | 133 | $86.9 \%$ | 153 |
| Soso | 8 | $7.5 \%$ | 98 | $92.5 \%$ | 106 |
| Iwaki | 35 | $10.0 \%$ | 316 | $90.0 \%$ | 351 |
| Aizu | 36 | $14.6 \%$ | 211 | $85.4 \%$ | 247 |
| Minamiaizu | 7 | $26.9 \%$ | 19 | $73.1 \%$ | 26 |
| Total | 247 | $11.4 \%$ | 1,924 | $88.6 \%$ | 2,171 |
| FY2019 | 304 | $12.9 \%$ | 2,050 | $87.1 \%$ | 2,354 |

【Table 12-2】Contents of free comments

| Content | Number | Proportion |
| :---: | :---: | :---: |
| Corona pandemic | 53 | 21.5\% |
| Positive comments about this survey | 47 | 19.0\% |
| Consultation about child rearing | 44 | 17.8\% |
| Anxiety about radiation effects on fetus and child health | 37 | 15.0\% |
| Mother's own poor mental health | 30 | 12.1\% |
| Opinions/complaints about this survey | 19 | 7.7\% |
| Mother's own poor physical health | 18 | 7.3\% |
| Request for information on radiation and survey results | 10 | 4.0\% |
| Request regarding thyroid examination | 7 | 2.8\% |
| Personal relationship(s) | 6 | 2.4\% |
| Request for improved parenting support services | 5 | 2.0\% |
| Anxiety about radiation effects on baby and/or general foods | 3 | 1.2\% |
| Anxiety related with the outcome of the latest pregnancy | 2 | 0.8\% |
| Anxiety and/or dissatisfaction about reliability or lack of information | 2 | 0.8\% |
| Financial anxiety and/or burden | 2 | 0.8\% |
| Request regarding health examination | 2 | 0.8\% |
| Request for internal exposure measurement (whole-body counting, etc.) | 2 | 0.8\% |
| Comments regarding external exposure (distribution of personal or environmental dosimeters, etc.) | 2 | 0.8\% |
| Request for improved medical services and physical care | 2 | 0.8\% |
| Anxiety about radiation effects on water | 1 | 0.4\% |
| Anxiety and/or dissatisfaction about insufficient medical services | 1 | 0.4\% |
| Request for financial support | 1 | 0.4\% |
| Request regarding Fukushima Health Management Survey | 1 | 0.4\% |
| Other | 45 | 18.2\% |

* Multiple answers were allowed. The denominator for percentage calculations is 247, the total number of those who wrote in the free comment section.
（4）Status of post－survey support
Number of support candidates in the Second Follow－up for FY2012 was 384 （ $17.7 \%$ of 2，171 respondents）
Tabulation of data regarding post－survey support is based on 2,171 responses returned between January 15 and June 30， 2021.

【Table 13】 Number and proportion of support candidates

| District | Respondents | Support candidates |  |
| :--- | ---: | ---: | ---: |
| Kenpoku | 710 | 143 | $20.1 \%$ |
| Kenchu | 578 | 87 | $15.1 \%$ |
| Kennan | 153 | 19 | $12.4 \%$ |
| Soso | 106 | 15 | $14.2 \%$ |
| Iwaki | 351 | 62 | $17.7 \%$ |
| Aizu | 247 | 53 | $21.5 \%$ |
| Minamiaizu | 26 | 5 | $19.2 \%$ |
| Total | 2,171 | 384 | $17.7 \%$ |
| FY2019 | 2,354 | 421 | $17.9 \%$ |

＊The denominator for percentage calculations is the number of respondents．

【Table 14】 Breakdown of support candidates，by district

| District | Support based on <br> depression <br> symptoms | Support based on the <br> content of free comments |  | Total |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Kenpoku | 108 | $75.5 \%$ | 35 | $24.5 \%$ | 143 |
| Kenchu | 70 | $80.5 \%$ | 17 | $19.5 \%$ | 87 |
| Kennan | 9 | $47.4 \%$ | 10 | $52.6 \%$ | 19 |
| Soso | 11 | $73.3 \%$ | 4 | $26.7 \%$ | 15 |
| Iwaki | 45 | $72.6 \%$ | 17 | $27.4 \%$ | 62 |
| Aizu | 39 | $73.6 \%$ | 14 | $26.4 \%$ | 53 |
| Minamiaizu | 4 | $80.0 \%$ | 1 | $20.0 \%$ | 5 |
| Total | 286 | $74.5 \%$ | 98 | $25.5 \%$ | 384 |
| FY2019 | 295 | $70.1 \%$ | 126 | $29.9 \%$ | 421 |

＊The sum of individual percentages for each question item may not add up to $100 \%$ due to rounding．

* The denominator for percentage calculations is the number of support candidates. The numbers of support candidates are cumulative totals. The sum of individual percentages may be other than $100 \%$ because multiple answers were allowed.
* The total number of support candidates (383) is different from Tables 14 and 15 (384) because one person had not received support as of the end of June 2021.

1) Support ended after listening carefully and helping to sort out the mother's problems
2) Support ended after providing information on relevant municipal service contact points and other useful information.
3) Support ended after confirming that the mother has already consulted doctors or other specialists.
4) Support ended after answering questions from the mother.
5) Support ended after recommending that the mother seek medical consultation.
6) Support ended after forwarding the mother's information to FMU's Mental Health Support Team (with consent).
7) Support ended after forwarding the mother's information to relevant sections of the municipality of residence (with consent).
8) Support ended after forwarding the mother's information to FMU's radiation consultation desk (with consent).
9) Support ended after forwarding the mother's information to medical specialists at FMU.

## Report on the TUE Full-Scale Survey (the fourth-round survey)

As of June 30, 2021

## 1. Summary

### 1.1 Purpose

In order to monitor the long-term health of children, we are now engaged in the Full-Scale Survey (the fourth-round survey), following the Preliminary Baseline Survey for background assessment of thyroid glands, and two Full-Scale Surveys (the second- and third-round surveys) to continuously confirm thyroid gland status.

### 1.2 Eligible Persons

All Fukushima residents approximately 18 years old or younger at the time of the Great East Japan Earthquake (those born between April 2, 1992 and April 1, 2012).

### 1.3 Implementation Period

FY2018 and FY2019, starting in April 2018:
1.3-1 For those 18 years old or younger

The examination will be carried out on a municipality-by-municipality basis in FY2018 and FY2019.
1.3-2 For those 19-20 years old

The examination will be carried out on an age group basis (i.e. school grade).
FY2018: those born in FY1996 and FY1998
FY2019: those born in FY1997 and FY1999

## 1.3-3 For those 25 years old and older

Those who are older than 20 are recommended to receive the examination every 5 years at the ages of 25,30 , and so on.

FY 2018: those born in FY1993
FY 2019: those born in FY1994
Results of the survey for those 25 years old will be reported separately.
1.4 Implementing Organizations (Number of medical facilities with agreements for implementation of thyroid examinations as of June 30,2021 )

Fukushima Prefecture commissioned Fukushima Medical University (FMU) to conduct the survey in cooperation with organizations inside and outside Fukushima for the convenience of participants.

1.4-1 Primary examination facilities<br>Inside Fukushima Prefecture 84 medical facilities<br>Outside Fukushima Prefecture 127 medical facilities

> 1.4-2 Confirmatory examination facilities
> Inside Fukushima Prefecture 5 medical facilities including FMU
> Outside Fukushima Prefecture $\quad 37$ medical facilities

### 1.5 Method

1.5-1 Primary examination

Ultrasonography of the thyroid gland
Assessments are made by specialists on the basis of the following criteria:

- Grade A

A1: No nodules/cysts
A2: Nodules $\leq 5.0 \mathrm{~mm}$ and/or cysts $\leq 20.0 \mathrm{~mm}$

- Grade B

Nodules $\geq 5.1 \mathrm{~mm}$ and/or cysts $\geq 20.1 \mathrm{~mm}$
Some A2 results may be re-classified as B results when clinically indicated.

- Grade C

Immediate need for confirmatory examination, judging from the condition of the thyroid gland.

## 1.5-2 Confirmatory examination

Ultrasonography of the thyroid gland, blood test, urine test, and fine needle aspiration cytology (FNAC) if needed for those with Grade B or C results.
Priority is given to those in urgent clinical need. A medical follow-up may be recommended based on confirmatory examination results.

## 1.5-3 Flow chart

Fig. 1 Flow chart

### 1.6 Municipalities Surveyed

The municipalities where examinations (for those 18 years old or younger) were carried out in FY2018 and FY2019 are as follows:

Fig. 2 Municipalities surveyed in FY2018 and FY2019
Note: Primary examinations that had been scheduled in March 2020 at elementary and junior high schools in Iwaki City but postponed due to COVID-19 pandemic were conducted in September and October of 2020.

## 2. Results as of June 30, 2021

### 2.1 Results of the Primary Examination

## 2.1-1 Implementation status

The examination was carried out for 183,352 (62.3\%) participants by June 30, 2021 (Implementation status for each municipality and prefectures other than Fukushima are shown in Appendix 1 and Appendix 2).
Results of 183,338 participants (100.0\%) have been finalized and individual result report were already sent to them. (The result for each municipality is shown in Appendix 3).
Of these, 61,691 (33.6\%) had Grade A1 results, 120,256 (65.6\%) had Grade A2, as A2, 1,391 ( $0.8 \%$ ) had Grade B, and none had Grade C.

Table 1 Progress and results of the primary examination

|  | Eligible persons <br> a | Participants (\%) |  | c (c/b) | Participants with finalized results (\%) |  |  |  |

Table 2 Number and proportion of participants with nodules/cysts

|  | Participants with finalized results <br> a | Participants with nodules/cysts (\%) |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Nodules |  | Cysts |  |
|  |  | $\begin{aligned} & \geq 5.1 \mathrm{~mm} \\ & \mathrm{~b} \quad \text { (b/a) } \\ & \hline \end{aligned}$ | $\begin{aligned} & \leq 5.0 \mathrm{~mm} \\ & \mathrm{c} \\ & \hline \end{aligned}$ | $\begin{array}{ll} \geq 20.1 \mathrm{~mm} \\ d & (\mathrm{~d} / \mathrm{a}) \\ \hline \end{array}$ | $$ |
| FY2018 | 107,967 | 700 (0.6) | 368 (0.3) | 4 (0.0) | 70,736 (65.5) |
| FY2019 | 75,371 | 686 (0.9) | 299 (0.4) | 1 (0.0) | 50,221 (66.6) |
| Total | 183,338 | 1,386 (0.8) | 667 (0.4) | 5 (0.0) | 120,957 (66.0) |

- Percentages are rounded to a lower decimal place. This applies to other tables as well.
- Those born between FY1992 and FY1995 are excluded as they are eligible for the Age 25 Survey. Results for Age 25 Survey participants will be reported separately.
- Age 25 Survey for those born in FY1992 (approx. 23,000), FY1993 (approx. 22,000), FY1994 (approx. 22,000), and FY1995 (approx. 21,000) took place in FY2017, FY2018, FY2019, and FY2020, respectively.

## 2.1-2 Participation rates by age group

The participation rate for each age group as of April 1 of each year is shown in Table 3.
Table 3 Participation rates by age group

2.1-3 Comparison of the third- and fourth-round survey results

Comparison of results of two Full-Scale Survey (third- and fourth-round surveys) is shown in Table 4.
Among 163,652 participants with Grade A1 or A2 results in the third-round survey, 162,973 (99.6\%) had Grade A1 or A2 results, and 679 ( $0.4 \%$ ) had Grade B results in the fourth-round survey.
Among 730 participants Grade B results in the third-round survey, 148 (20.3\%) had Grade A1 or A2 results, and 582 ( $79.7 \%$ ) had Grade B results in the fourth-round survey.

### 2.2 Results of the Confirmatory Examination

## 2.2-1 Implementation status

By June 30, 2021, 1,021 (73.4\%) of 1,391 people have received the examination. Of those, 991 ( $97.1 \%$ ) had completed the entire process of the confirmatory examination. (Progress and results of the confirmatory examination are shown in Table 5.)
Of the aforementioned 991 participants, 93 ( $9.4 \%$ ) were confirmed to meet Grade A diagnostic criteria by the primary examination standards (A1: 6, A2: 87) (including those with other thyroid conditions).
The remaining $898(90.6 \%)$ were confirmed to be outside of A1/A2 criteria.
Table 5 Progress and results of the confirmatory examination

|  | Those referred to confirmatory exams <br> a | $\begin{array}{cc} \text { Participants (\%) } \\ \text { b } & (b / a) \\ \hline \end{array}$ | Total$\mathrm{c} \quad(\mathrm{c} / \mathrm{b})$ | Those with finalized results (\%) |  |  |  |

2.2-2 Results of fine needle aspiration cytology (FNAC)

Among those who underwent FNAC, 36 had nodules classified as malignant or suspicious for malignancy: 16 of them were male, and 20 were female.
Participants' age at the time of the confirmatory examination ranged from 9 to 24 years (mean age: $16.6 \pm 3.0$ years). The minimum and maximum tumor diameters were 6.1 mm and 29.4 mm . Mean tumor diameter was $13.3 \pm 6.4 \mathrm{~mm}$.

Of these 36 participants, 25 had Grade A results (A1: 6, A2: 19), 8 had Grade B results in the thirdround survey. The remaining 3 people did not participate in the third-round survey.

Table 6. Results of FNAC
A. Municipalities surveyed in FY 2018

- Malignant or suspicious for malignancy : $20^{*}$
- Male to female ratio :

10:10

- Mean age (SD, min-max):
16.4 (3.2, 11-24), $8.2(2.9,2-14)$ at the time of disaster
- Mean tumor size:
B. Municipalities surveyed in FY 2019
- Malignant or suspicious for malignancy : $11.7 \mathrm{~mm}(5.2 \mathrm{~mm}, 6.9-29.4 \mathrm{~mm})$
- Male to female ratio :
$16^{*}$
- Mean age (SD, min-max):

6:10

- Mean tumor size:
$17.0(2.8,9-20), 8.1(2.9,0-12)$ at the time of disaster $15.3 \mathrm{~mm}(7.4 \mathrm{~mm}, 6.1-29.0 \mathrm{~mm})$
C. Total
- Malignant or suspicious for malignancy :
$36^{*}$
- Male to female ratio :

16:20

- Mean age (SD, min-max):
$16.6(3.0,9-24), 8.1(2.9,0-14)$ at the time of disaster $13.3 \mathrm{~mm}(6.4 \mathrm{~mm}, 6.1-29.4 \mathrm{~mm})$
${ }^{*}$ ) Surgical cases are as shown in Appendix 6.

## 2.2-3 Age distribution of malignant or suspicious-for-malignancy cases diagnosed by FNAC

Age distributions of 36 people with malignant or suspicious nodules based on their age as of March 11, 2011 is per Fig. 3, and age distribution based on their age at the time of confirmatory examination is per Fig. 4.

Fig. 3 Age as of 11 March
Note: Those aged between 15 and 18 at the time of disaster are not included in the fourth-round survey participants.

The horizontal axis begins at -1 to include Fukushima Prefecture residents born between April 2, 2011 and April 1, 2012.
*Those born between March 12 and April 1, 2011 are included in age 0 .

Fig. 4 Age as of the date of confirmatory examination
2.2-4 Basic Survey results of those with malignant or suspicious nodules by FNAC Of the 36 people with malignant or suspicious nodules, 11 people ( $30.6 \%$ ) had participated in the Basic Survey (for external radiation dose estimation), and all 11 received their results. The highest effective dose documented was 2.4 mSv .

Table 7 A breakdown of dose estimates for Basic Survey participants

| $\begin{gathered} \text { Effective } \\ \text { dose } \\ (\mathrm{mSv}) \end{gathered}$ | Age at the time of the disaster |  |  |  |  |  |  |  |  |  |

| Other: 913 persons | $1.2 \pm 0.2(5.0 \%)$ | $3.5 \pm 0.7(6.9 \%)$ | $1.2 \pm 0.8(7.8 \%)$ | $32.2 \pm 113.2(16.3 \%)$ | $6.8 \%$ | $6.8 \%$ |

Table 9 Urinary iodine test results
( $\mu \mathrm{g} / \mathrm{day}$ )

|  | Minimum | 25th percentile | Median | 75th percentile | Maximum |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Malignant or suspicious: <br> 36 persons | 35 | 94 | 195 | 426 | 1,783 |
| Other: 904 persons | 32 | 119 | 193 | 346 | 31,920 |

1) FT4: free thyroxine; thyroid hormone binding 4 iodides; higher among patients with thyrotoxicosis (such as Graves' disease) and lower with hypothyroidism (such as Hashimoto's thyroiditis).
2) FT3: free triiodothyronine; thyroid hormone binding 3 iodines; higher among patients with thyrotoxicosis (such as Graves' disease) and lower with hypothyroidism (such as Hashimoto's thyroiditis).
3) TSH: thyroid-stimulating hormone; higher among patients with Hashimoto's disease and lower with Graves' disease.
4) Tg: thyroglobulin; higher when thyroid tissue is destroyed or when neoplastic tissue produces thyroglobulin.
5) TgAb: anti-thyroglobulin antibody; higher among patients with Hashimoto's disease and Graves' disease.
6) TPOAb: anti-thyroid peroxidase antibody; higher among patients with Hashimoto's disease or Graves' disease.
7) Reference interval varies according to age.

## 2.2-6 Confirmatory examination results by area

The percentages of those with malignant or suspicious nodules were $0.03 \%$ in Hamadori, and $0.02 \%$ in both Nakadori and Aizu, versus $0.01 \%$ in the 13 municipalities of the nationally-designated evacuation zone.

Table 10 Confirmatory examinaton results by area

|  | Number of participants a | Those referred to confirmatory exam b | Percentage of $b$ (\%) <br> b/a | Confirmatory exam participants | Malignant or suspicious cases <br> c | Percentage of c <br> (\%) <br> c/a |

## 3. Mental Health Care

We provide the following support for thyroid examination participants.

### 3.1 Support for Primary Examination Participants

After the examination, medical doctors offer person-to-person explanation of examination results, showing the ultrasound images in private consultation booths at examination venues set up in public facilities.

Consultation booths were set up at all venues for examinations conducted in and after April 2018; as of June 30, 2021, 2,646 (100\%) of 2,647 participants have visited these consultation booths.

### 3.2 On-location Lectures and Information Sessions

To help participants or their parents/guardians improve their understanding of the thyroid examination, we have conducted on-location lectures and information sessions since April 2018.
By March 31, 2020, a total of 1,063 people had participated in these sessions, offered at 32 locations.

### 3.3 Support for Confirmatory Examination Participants

A support team has been set up within Fukushima Medical University to offer psychological support to address the anxiety and concerns of confirmatory examination participants during examination., The team also answers questions and offers counseling via our website.

Since the start of the fourth-round survey, 479 participants ( 160 males and 319 females) have received support as of June 30,2021 . The number of support sessions provided was 947 in total. Of these, 476 $(50.3 \%)$ received support at the participants' first examination and 471 (49.7\%) at subsequent examinations.
For those who proceeded to regular insured medical care, the support team continues to provide support in cooperation with teams of medical staff at hospitals.

*1) The number of participants who received the examination at facilities outside Fukushima (as of May 31, 2021)
*2) Split cells show the number of participants above the corresponding percentage.
*3) The number of participants who have resident registration outside of Fukushima.

- Age groups are based on participants' age at the Full-Scale Survey (the fourth-round survey). This applies to other tables hereafter.

## Appendix 6

Surgery cases for malignancy or suspicion of malignancy

1. Municipalities surveyed in FY2018

Malignant or suspicious for malignancy: 20 ( 15 surgical cases: 15 papillary thyroid carcinomas)
2. Municipalities surveyed in FY2019

Malignant or suspicious for malignancy:
16 (14 surgical case: 14 papillary thyroid carcinomas)
3. Total

Maalignant or suspicious for malignancy: 36 ( 29 surgical cases: 29 papillary thyroid carcinomas)

## 1. Summary

### 1.1 Purpose

In order to monitor the long-term health of children, we are now engaged in the Full-Scale Survey (fifth-round survey), following the Preliminary Baseline Survey for background assessment of thyroid glands, and three Full-Scale Surveys (second-, third-, and fourth-round surveys) to continuously confirm the status of thyroid glands.

### 1.2 Eligible persons

All Fukushima residents approximately 18 years old or younger at the time of earthquake (those born between April 2, 1992 and April 1, 2012).

### 1.3 Implementation Period

FY2020 and FY2021, starting in April 2020:
1.3-1 For those 18 years old or younger

The examination will be carried out over 3 years, from FY2020 through FY2022.

## 1.3-2 For those 19 years old or older

The examination will be carried out on an age group basis (i.e., school grade).
FY2020: those born in FY1998 and FY2000
FY2021: those born in FY1999 and FY2001

## 1.3-3 For those 25 years old or older

Those who are older than 20 are recommended to receive the examination every 5 years at the ages of 25,30 , and so on.
FY2020: those born in FY1995
FY2021: those born in FY1996
Results of the survey for those 25 years old will be reported separately.
1.4 Implementing Organizations (Number of medical facilities with agreements for implementation of thyroid examinations as of June 30, 2021)
Fukushima Prefecture commissioned Fukushima Medical University (FMU) to conduct the survey in cooperation with organizations inside and outside Fukushima for the convenience of participants (the number of medical facilities shown below is as of March 31, 2021).

## 1.4-1 Primary examination facilities <br> Inside Fukushima Prefecture 84 medical facilities <br> Outside Fukushima Prefecture 127 medical facilities

1.4-2 Confirmatory examination facilities
Inside Fukushima Prefecture $\quad 5$ medical facilities including FMU
Outside Fukushima Prefecture $\quad 37$ medical facilities

### 1.5 Methods

1.5-1 Primary examination

Ultrasonography of the thyroid gland
Assessments are made by specialists on the basis of the following criteria:

- Grade A

A1: No nodules/cysts

A2: Nodules $\leq 5.0 \mathrm{~mm}$ or cysts $\leq 20.0 \mathrm{~mm}$

- Grade B

B: Nodules $\geq 5.1 \mathrm{~mm}$ or cysts $\geq 20.1 \mathrm{~mm}$
Some A2 results may be re-classified as B results when clinically indicated.
-Grade C
C: Immediate need for confirmatory examination, judging from the condition of the thyroid gland.

## 1.5-2 Confirmatory examination

Ultrasonography of the thyroid gland, blood test, urine test, and fine needle aspiration cytology (FNAC) if needed for those with B or C test results.
Priority is given to those in urgent clinical need. A medical follow-up may be recommended based on confirmatory exam results.

## 1.5-3 Flow chart

Fig. 1 Flow chart

### 1.6 Municipalities Surveyed

The municipalities where examinations (for those 18 years old or younger) were carried out in FY2020 and FY2021 are as follows:

$\square$ Primary examinations in FY2021 (7 municipalities)
$\square$ Primary examinations in FY2022 (34 municipalities)
Note: Primary examinations that had been scheduled in FY2020 at elementary and junior high schools started in September 2020.

Fig. 2 Municipalities covered for primary examinations at elementary and junior high schools

Fig. 3 Municipalities covered for primary examinations at high schools and other facilities

Results of these surveys were aggregated based on the year when examinations were originally scheduled, which may differ from the year in which some examinations were actually conducted.

## 2. Results as of June 30, 2021

### 2.1 Results of the Primary Examination

## 2.1-1 Implementation status

The primary examination was carried out for 32,404 participants (12.8\%) by June $30,2021$.
Results of 24,882 participants (76.8\%) have been finalized and individual result reports were already sent to them.

Of these, 7,844 (31.5\%) had Grade A1 results, 16,747 (67.3\%) had Grade A2, 291 (1.2\%) had Grade B, and none had Grade C.

Table 1 Progress and results of the primary examination

|  | Eligible persons <br> a | Participants (\%) |  | c (c/b) | Participants with finalized results (\%) |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | b | Outside the prefecture |  | A |  | Those referred to confirmatory exam |  |
|  |  |  |  |  | A1 | A2 | B | C |
|  |  |  |  |  | d (d/c) | e (e/c) | f (f/c) | g (g/c) |
| FY2020 | 144,864 | 29,340 (20.3) | 3,908 | 22,760 (77.6) | 7,155 (31.4) | 15,379 (67.6) | 226 (1.0) | 0 (0.0) |
| FY2021 | 107,986 | 3,064 (2.8) | 508 | 2,122 (69.3) | 689 (32.5) | 1,368 (64.5) | 65 (3.1) | 0 (0.0) |
| Total | 252,850 | 32,404 (12.8) | 4,416 | 24,882 (76.8) | 7,844 (31.5) | 16,747 (67.3) | 291 (1.2) | 0 (0.0) |

Table 2 Number and proportion of participants with nodules/cysts
(See Appendix 1 for more details)

|  | Participants with finalized results <br> a | Participants with nodules/cysts (\%) |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Nodules |  | Cysts |  |
|  |  | $\begin{array}{lr} \hline \geq 5.1 \mathrm{~mm} \\ b & (\mathrm{~b} / \mathrm{a}) \\ \hline \end{array}$ | $\begin{array}{lr} \hline \leq 5.0 \mathrm{~mm} \\ \mathrm{c} & (\mathrm{c} / \mathrm{a}) \\ \hline \end{array}$ | $\begin{array}{cr} \hline \geq 20.1 \mathrm{~mm} \\ \mathrm{~d} & (\mathrm{~d} / \mathrm{a}) \\ \hline \end{array}$ | $\begin{array}{lr} \hline \leq 20.0 \mathrm{~mm} \\ \mathrm{e} & (\mathrm{e} / \mathrm{a}) \\ \hline \end{array}$ |
| FY2020 | 22,760 | 226 (1.0) | 115 (0.5) | 0 (0.0) | 15,501 (68.1) |
| FY2021 | 2,122 | 65 (3.1) | 31 (1.5) | 0 (0.0) | 1,402 (66.1) |
| Total | 24,882 | 291 (1.2) | 146 (0.6) | 0 (0.0) | 16,903 (67.9) |

- Proportions are rounded to a lower decimal place. This applies to other tables as well.
- Those who receive the examination at 5-year intervals (born between FY1992 and FY1997) are excluded. The results of examinations with 5 -year intervals will be shown separately.
- Examinations for those born in FY1992 (approx. 23,000), FY1993 (approx. 22,000), FY1994 (approx. 22,000), FY1995 (approx. 21,000) took place in FY2017, FY2018, FY2019, and FY2020, respectively. Examinations for those born in FY1996 (approx. 21,000) and FY1997 (approx. 20,000 ) will be carried out in FY2021 and FY2022, respectively.

## 2.1-2 Participation rate by age group

The participation rate for each age group as of April 1 of each year is shown in Table 3.
Table 3 Participation rates by age group

|  |  | Total |  | ge group |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| FY2020 | Age group* |  | 8-11 | 12-17 | 18-24 |
|  | Eligible persons (a) | 144,864 | 37,067 | 61,908 | 45,889 |
|  | Participants (b) | 29,340 | 13,397 | 13,280 | 2,663 |
|  | Participation rate (\%) (b/a) | 20.3 | 36.1 | 21.5 | 5.8 |
| FY2021 | Age group ** |  | 9-11 | 12-17 | 18-24 |
|  | Eligible persons (a) | 107,986 | 19,722 | 45,057 | 43,207 |
|  | Participants (b) | 3,064 | 368 | 721 | 1,975 |
|  | Participation rate (\%) (b/a) | 2.8 | 1.9 | 1.6 | 4.6 |
| Total | Eligible persons (a) | 252,850 | 56,789 | 106,965 | 89,096 |
|  | Participants (b) | 32,404 | 13,765 | 14,001 | 4,638 |
|  | Participation rate (\%) (b/a) | 12.8 | 24.2 | 13.1 | 5.2 |

2.1-3 Comparison of the fourth- and fifth-round survey results

Comparison of results of two Full-Scale Surveys (fourth- and fifth-round surveys) is shown in Table 4.
Among 22,668 participants with Grade A1 or A2 results in the fourth-round survey, 22,520 (99.3\%) had Grade A1 or A2 results and 148 ( $0.7 \%$ ) had Grade B results in the fifth-round survey.
Among 122 participants with Grade B results in the fourth-round survey, 19 (15.6\%) had Grade A1 or A2 results and 103 ( $84.4 \%$ ) had Grade B results in the fifth-round survey.

Table 4 Comparison of the fourth- and fifth-round surveys

* Results of the fourth-round survey are from fifth-round survey participants with finalized results, not the breakdown of all fourth-round survey participants.
** Results of the fifth-round survey participants who were diagnosed for each grade in the fourth-round survev.

### 2.2 Results of the Confirmatory Examination

## 2.2-1 Implementation status

By June $30,2021,175$ ( $60.1 \%$ ) of the 291 eligible persons had participated in the confirmatory examination, and $144(82.3 \%)$ of them had completed the entire procedure of the examination.
Of the aforementioned 144 participants, 15 (A1: 0, A2: 15) ( $10.4 \%$ ) were confirmed to meet A1 or A2 diagnostic criteria by the primary examination standards (including those with other thyroid conditions) after detailed examination; 129 ( $89.6 \%$ ) were confirmed to be outside of A1/A2 criteria.

Table 5 Progress and results of the confirmatory examination

|  | Those referred to confirmatory exams <br> a | Participants (\%) <br> b $\quad(b / a)$ | Total$\text { c } \quad(c / b)$ | Those with finalized results (\%) |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

|  |  |  |  |  |  |  | FNAC |
|  |  |  |  | d (d/c) | e (e/c) | f (f/c) | g (g/f) |
| FY2020 | 226 | 143 (63.3) | 119 (83.2) | 0 (0.0) | 13 (10.9) | 106 (89.1) | 5 (4.7) |
| FY2021 | 65 | 32 (49.2) | 25 (78.1) | 0 (0.0) | 2 (8.0) | 23 (92.0) | 2 (8.7) |
| Total | 291 | 175 (60.1) | 144 (82.3) | 0 (0.0) | 15 (10.4) | 129 (89.6) | 7 (5.4) |

## 2.2-2 Results of fine needle aspiration cytology (FNAC)

Among those who underwent FNAC, 3 people, all females, had nodules classified as malignant or suspicious for malignancy.

```
A. Municipality surveyed in FY2020
    -Malignant or suspicious for malignancy: 2*
    - Male to female ratio: 0:2
B. Municipalities surveyed in FY2021
    - Malignant or suspicious for malignancy: 1*
    - Male to female ratio: 0:1
C. Total
    - Malignant or suspicious for malignancy: 3*
    - Male to female ratio: 0:3
```

Table 6 Results of FNAC

* Appendix 2 shows surgery cases.

## 3. Mental Health Care

We provide the following support for thyroid examination participants.

### 3.1 Support for Primary Examination Participants

After the examination, medical doctors offer person-to-person explanation on examination results, showing ultrasound images in private consultation booths at examination venues set up in public facilities.

Consultation booths were set up at all venues for examinations conducted in and after April 2020, and as of June 30, 2021, all 822 participants (100\%) have visited these consultation booths.

### 3.2 On-location Lectures and Information Sessions

To help participants and their parents/guardians improve their understanding of the thyroid examination, we have conducted on-location lectures and information sessions since April 2018.

By June 30, 2021, a total of 392 people participated in these sessions offered at 6 locations.
Since the start of these sessions, 15,478 people have participated.

### 3.3 Support for Confirmatory Examination Participants

A support team has been set up within Fukushima Medical University to offer psychological support to address the anxiety and concerns of confirmatory examination participants during examination., The team also answers questions and offers counseling via our website.

Since the start of the fifth-round survey, 110 participants ( 40 males and 70 females) have received support as of June 30, 2021. The number of support sessions provided was 169 in total. Of these, 110 (65.1\%) received support at the participants' first examination and 59 (34.9\%) at subsequent examinations.

For those who proceeded to regular insured medical care, the support team continues to provide support in cooperation with teams of medical staff at hospitals.
